# THE MUSIC CHART BOARD

## LIGHTNING SYMBOL

If a player's meeples land on the lightning symbol, it triggers an **unexpected action**. The player must **draw a card from the main deck, show it to all players, and use it immediately within their own groups** on the table, whether it is a positive or negative card.

## IDOLS' CLASH

When a player passes for the first time on the yellow star on the chart board or plays an event card IDOLS CLASH, it triggers a **battle between groups**.

# IDOLS' CLASH

- Each player chooses a group from his own board, even consisting of only 1 idol.

- Each player can choose to **exchange up to 3 cards** from their hand.

- During each player's turn, they can **only play 1 event card** either within their own group or in their opponents groups.

- Once all the events are exhausted, fame points accumulated by the groups are totaled, and **the group with the highest score emerges as the winner.**

The victor receives a permanent card featuring **the crown symbol**, which can be used for one of their idols on the board. **The idol then becomes the leader of the group!**
